

Enabling Cookies

Microsoft Internet Explorer 8.0 - 10.0

Select the 'Tools->Internet Options' menu item, and then open the 'Privacy' tab - you can then adjust the slider to block or allow various categories of cookie. Alternatively by clicking 'Advanced...' you can exercise finer control over the browser's behavior, choosing whether to accept, block, or prompt for cookies originating either on the website you are visiting (first party cookies) or originating from websites other than the one you are visiting (third party cookies, typically used by banner advertisements hosted on an advertiser's website).

Firefox 7.0 and newer

Use the 'Tools->Options' menu item (may be under the Firefox button), then choose the 'Privacy' tab. Set the 'Firefox will:' option to 'Use custom settings for history'. Now you can choose whether cookies are enabled for websites you visit and third party websites, and if so how long they will persist. You can also use the 'Exceptions' button to override the settings for particular websites.

Firefox 3.0

Use the 'Tools->Options' menu item, and then choose the 'Privacy' tab. Here you can choose whether cookies are enabled, and if so how long they will persist. You can also use the 'Exceptions' button to override the settings for particular websites.

Google Chrome 5.0

Choose 'Options' on the 'Customize and control' menu, and then open the 'Under the Bonnet' tab. In the 'Privacy' section, click on the 'Content settings...' button and open the 'Cookies tab. Set the required cookie behavior and use the 'Exceptions...' button (if required) to configure specific websites.

Apple Safari 5.1

Choose 'Preferences...' on the 'Settings' or 'Edit' menu (Windows) or the Safari menu (MacOS), then open the 'Privacy' tab. Now set the required cookie behavior.

Apple iOS (iPhone, iPad)

From the home screen tap the 'Settings' icon, and then choose 'Safari'. Find the 'Accept Cookies' option and set the required cookie behavior.

Android

Tap the 'Internet' icon to start the browser, and then press the phone's menu button. From the list of options, choose 'More', and then select 'Settings'. Scroll down the resulting list and check or uncheck the 'Accept Cookies' item.

Windows Phone 7/8

In Internet Explorer, tap 'More...' then 'Settings'. Check or clear the 'Allow cookies on my phone' item to set the required cookie behavior.
